What makes a truly great car?

The badge. The equipment? The performance figures?
Or does it go a whole lot deeper than this? We believe it does.

With Vectra, we've made a conscious decision to challenge convention and revisit the rules of good car design. By distilling the essence of what goes to make a really outstanding model – great styling, a comfortable travelling environment and, above all else, a rewarding driving experience – our engineers and designers have created a vehicle which exceeds expectations in every department. And stands proud as the single most complete car in its class. No wonder it has just been voted 'Best Family Car' in the *What Car?* Car of the Year Awards 2003.

A close-up photograph of the front left corner of a white car. The image shows the headlight assembly, which includes a large clear lens with a yellowish-orange light source and a smaller circular fog light below it. To the left of the headlight is a white multi-spoke alloy wheel with a black tire. The car's body is white and has a sleek, modern design. The background is blurred, suggesting an outdoor setting.

*We made a conscious attempt
to push the boundaries.*

Sometimes it pays to look
at things differently.

"Tell people what you do for a living and there's a natural expectation that you love cars. What people are less prepared for is our sheer obsession with detail. We're passionate about the smallest things! I lived and breathed this car for five years and knew that each and every detail had to convey confidence and a real sense of quality. The expectations were high but we rose to the challenge."

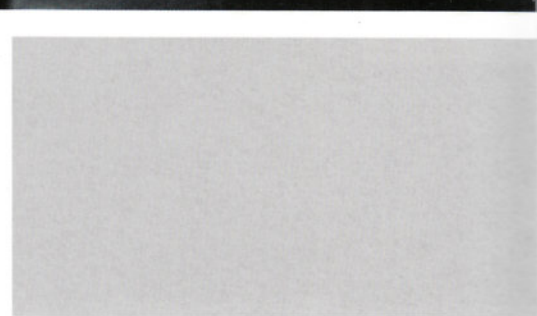

VECTRA DESIGNER

*We took inspiration from art,
from architecture, from life.*

Vectra's fresh, contemporary styling exudes appeal from every angle. With boldly defined surfaces that convey real solidity and purpose, here's a car that looks great, whatever the surroundings.

*We exploited the tension between
absolute power and absolute restraint*

"Of course we tested the car to extremes; not only on the test track, but in the heat of the desert and in freezing Arctic conditions. Some 1.6 million kilometres across four continents. We like to make the car suffer! But at the end of the day this car's not about endurance – it's about delivering class-leading ride comfort and phenomenal roadholding. The end result? A car that simply demands to be driven and is destined to become the new class leader."

VECTRA DEVELOPMENT ENGINEER

A blue car is shown from the side, driving on a winding road. The background is heavily blurred to convey a sense of high speed and motion. The road curves into the distance, and the surrounding landscape is indistinct due to the blur.

*We balanced comfort with agility,
refinement with performance.*

Superbly engineered for a truly rewarding driving experience, Vectra is a car you'll feel good about from the first moment you slip into the driving seat.

We wanted people to feel comfortable
yet completely focused.

"This is a car of contradictions. Sure it feels safe, comfortable, well organised. You'd expect that from a Vauxhall. But beyond that there's a real sense of allure, a sexiness even. Take the fabrics and materials. Very tactile and sophisticated. Too 'rich' for a car in this class? We don't think so. And just look at the reaction they create."

VECTRA INTERIOR STYLIST

A black and white photograph of a car's interior, focusing on the rear passenger area. The seats are upholstered in black leather with visible stitching. A seatbelt is visible on the left side. The dashboard and door panels feature a wood-grain trim. The overall atmosphere is one of luxury and comfort.

*We set out to create a
uniquely relaxing environment.*

Vectra is not only bright, roomy, and cleverly thought out – it's also a great place to spend a journey, thanks to its superbly judged driving position, carefully co-ordinated trims and high quality materials.

1

2

Infinitely
precise

3

3

Driving position

With rake and reach adjustable steering backed by an eight-way adjustable seat, Vectra makes it easy for drivers of all shapes and sizes to achieve the perfect driving position. The front seats have been designed for optimum support and outstanding comfort over even the longest distances. Added to this, drivers' seats with height, tilt and lumbar adjustment are standard right across the range. For an added touch of luxury, eight-way electrically adjustable driver's and front passenger's seats – with driver's side memory function – are available as an option on Elegance and Elite models. SXi, SRi and GSi models feature contoured, sports-style front seats.

Multi-function display

All Vectra models feature a monochromatic screen located centrally at the top of the fascia. This multi-function display panel provides a read-out of the time, outside temperature and audio settings, along with an ice warning indicator. A fully-featured trip computer can be specified on all models and a five-inch colour monitor is available on models specified with optional navigation equipment.

Steering wheel mounted controls

Audio and communications functions can be controlled from new-style buttons located directly on the steering wheel – sporty three-spoke on SXi, SRi and GSi, classic four-spoke on other models. The horn push is located more logically in the centre of the steering wheel boss.

Touch activated direction indicators

Advanced technology at your fingertips. Literally. Vectra's direction indicators are 'touch activated', the stalk remaining in the neutral position even after the indicators have been engaged (they switch off, electronically, once the steering wheel returns to the straight-ahead position). The merest pressure on the stalk when changing lanes sends a three-flash signal to other drivers that you are pulling across.

Multi-function control pad

The switches for the electrically operated front windows are conveniently located on the door panels. The driver's side panel functions as a multi-function 'control pad', also including the switches for the electrically adjustable mirrors (complete with folding facility where specified), the electrically operated rear windows (where fitted), including a child-proof safety isolation feature, central locking and electric tailgate/boot lid unlock function.

An informed driver is a more relaxed and safer driver; that's why Vectra's designers have gone to such lengths to optimise the ergonomics and visual display elements of the vehicle.

Easy-to-read instruments – featuring crisp white graphics on a classic black background – provide all the essential information at a glance. Switchgear falls logically to hand and functions with reassuring precision. The driving position, too, is a model of comfort, thanks to eight-way adjustable seats and a steering wheel that can be adjusted for rake and reach on all models.

- 1 Eight-way adjustable driver's seat is standard on all models; power adjustment is also available.
- 2 Multi-function control pad.
- 3 All Vectra models feature a steering column adjustable for reach and rake.

Front and rear parking distance sensors

Vectra can be specified with both front and rear parking distance sensors – a rarity among cars in this class. The system is activated by engaging reverse gear and deactivated when the vehicle speed rises above a set level or when a trailer is attached. It can also be switched off using a button on the centre console: the front sensors can also be activated individually using the same button.

Flexible luggage area

Both saloon and hatchback versions of the Vectra offer generous luggage carrying potential. Indeed, with a total luggage area volume of 500 litres, Vectra offers one of the biggest luggage spaces in its class. All Vectra models also feature a 60/40 split-folding rear seat back with folding centre armrest and load-through facility (ideal for skis etc.). Both parts of the rear seat back can be folded down in one movement, without removing the rear head restraints.

- 1 Lidded storage compartment in rear seat centre armrest.
- 2 Twin drinks holders built into rear seat cushion.
- 3 Sliding front centre armrest.
- 4 Fold-flat front passenger seat.
- 5 60/40 split-folding rear seat back.

Effortlessly practical

Reverse-assist passenger door mirror

When reverse gear is engaged, the passenger's side mirror can tilt downwards, enabling the driver to see obstacles – such as kerbs – and avoid them when parking. Optional at extra cost on Elegance and Elite models fitted with driver's and passenger's electrically operated seat option.

Improved ease of entry

Vectra's designers paid special attention to ease of entry into the car. The front door sills are now lower, which, combined with wide door openings, makes for easier entry and exit. At the back, the size of the openings also makes it easier for passengers to slip comfortably into the rear, without obstruction.

Fold-flat passenger seat

Elegance and Elite models feature a front passenger's seat complete with fold-flat facility. With the seat back lowered fully on to the seat cushion, the seat can double as an impromptu table top or will allow the vehicle to accommodate long or awkwardly-shaped loads.

Luggage protection and safety

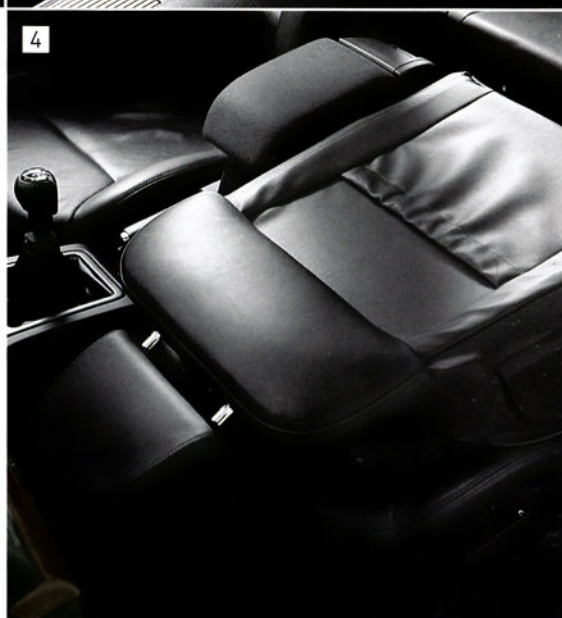

Vectra's load floor and rear seat back are fully carpeted to help protect luggage and reduce noise. Both saloon and hatchback models feature load restraint lashing eyes built into the rear floor and front panel of the luggage compartment. These provide secure anchorage for accessory restraining straps or a load floor net, both of which can help prevent luggage from sliding around in transit. To help keep luggage out of sight of prying eyes, all hatchback models feature a hinged luggage cover which rises with the tailgate for ease of access.

Sliding front centre armrest

Vectra's front armrest features two levels of storage. The upper section lifts to reveal a shallow tray suitable for storing coins, tickets and similar items; the tray itself then lifts to provide access to an additional storage area suitable for holding larger items like cassette tapes and compact discs.

Other convenience features include:

- Large, illuminated glovebox
- Large front door pockets
- Driver's-side storage box
- Twin centre console drinks holders
- Driver's sunglasses holder (models without sunroof) – Elegance, Elite and GSi models
- Lidded storage compartment in rear seat centre armrest
- Front seat back map pockets
- Twin drinks holders built into rear seat cushion of Elegance, Elite and GSi models
- Twin luggage area storage compartments
- Storage straps for accessory warning triangle in luggage area
- Tyre valve cap tool

Intelligently designed and meticulously executed, Vectra offers the best possible blend of space, versatility and comfort.

Strong attention to detail is reflected in a host of on-board storage features that allow you and your passengers to organise your travelling environment in line with the basic requirements of convenience and safety.

1

2

Singularly
complete

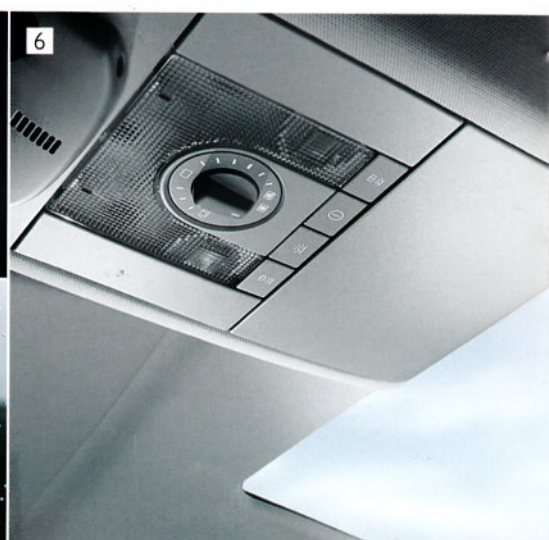

3

4

5

6

Air-conditioning

Air-conditioning provides chilled air on hot days and can increase your comfort and safety, with faster window demisting on wet days and a fresher travelling environment all year round.

'Smart' electronic climate control

Elite and GSi feature the added sophistication of microprocessor-controlled Electronic Climate Control (ECC). The system examines more than 200 different characteristics inside and outside the car before adjusting the climate. It also monitors changes inside the car for up to two hours after it has been parked, so it is ideally set up for the next journey. It can even keep the glovebox cool (if required).

Dual zone mode and sun sensor

The dual zone mode allows different settings to be chosen by the driver and front passenger. The dual zone sun sensor detects both the intensity of the sun's rays and their direction, automatically increasing the cooling on the hottest side of the car to maintain the desired all-round temperature.

Air Quality Sensor (AQS)

The air quality sensor detects potentially harmful exhaust fumes as they enter the vehicle, switching to recirculation mode if the levels exceed a predetermined figure. Unlike 'linear' systems which activate recirculation almost permanently in areas of high traffic density, Vectra's system continuously adjusts itself, ensuring that sufficient fresh air remains inside the vehicle even when driving through pockets of low air quality.

Activated carbon filter

A pollen filter traps dust, soot, pollen and spores; on models fitted with ECC an activated charcoal coating largely eliminates particles and unpleasant odours before they reach the occupants.

Cruise control

For the first time in a Vauxhall model in this segment, cruise control is standard right across the range. Key benefits include improved driving comfort on long journeys and easier observance of speed limits.

Retractable rear side window sunblinds

Rear side window sunblinds are optional at extra cost on all models, providing shade in the rear of the car on sunny days – ideal when children are on board.

Rain-sensitive windscreen wipers

This feature is standard on all models. A Light Emitting Diode (LED) built into the rear-view mirror housing transmits light which is reflected by the windscreen and back to a photodiode also contained within the housing. If a raindrop hits the glass, it changes the reflection path of the light and reduces the amount of light received back by the photodiode. The wipers are then activated automatically. The sensitivity of the system can be adjusted or simply switched off if so desired.

Anti-dazzle rear-view mirror

The reflection in the rear-view mirror dims automatically if the headlights of a vehicle behind are substantially brighter than the light in front of the car. The driver's door mirror employs the same principle when optional electric folding door mirrors are fitted.

Indirect night lighting

Standard on all models this feature works via red and green LEDs integrated into the rear-view mirror housing to provide gentle ambient lighting of the centre console.

Tyre Pressure Monitoring System (TPMS)

Sensors located on the inner sides of the tyre valves permanently monitor the tyre pressures; if the pressure dips below the recommended level, a warning display informs the driver which tyre is affected. On vehicles fitted with the driver information centre, the precise pressure of the respective tyre will be shown on the information display. TPMS is optional at extra cost across the range.

Other comfort and convenience features:

- Electrically operated front windows with one-touch operation and safety autoreverse feature are standard on all Vectra models
- Electrically operated rear windows are fitted to some models
- All models feature electrically operated – and heated – door mirrors. They automatically reset to a position set by the driver when electrically adjustable seats are specified
- Door mirrors can also be folded back electrically (optional at extra cost)
- An electrically operated slide/tilt glass sunroof is optional at extra cost on every model

From the most affordable models, through comfort- and sports-oriented versions right up to the most luxurious, top-of-the-line variants, Vectra is never anything less than 'the complete package'.

Indeed, whichever model you choose, you can rest assured that Vectra comes with the kind of luxury equipment usually associated with more expensive 'premium' models.

1 | ECC.

2 | Retractable rear side window sunblinds.

3 | Air-conditioning.

4 | Cruise control.

5 | Rain-sensitive windscreen wipers.

6 | Electrically-operated slide/tilt glass sunroof.

Euro 4 compliant petrol engines

Vectra offers a choice of four Euro 4 compliant petrol engines. These range from the entry level 1.8i 16v unit through the popular 2.2i 16v and 3.2i 24v V6 engines, to the new, all-aluminium 2.0i 16v Turbo unit - delivering dynamic performance and particularly high levels of torque. A Dualfuel LPG/petrol version of the 1.8 litre unit is also available.

New 2.0i 16v Turbo

A sophisticated development of our successful 2.2i 16v engine, this new 175PS turbocharged unit offers a powerful yet lower capacity alternative to the refinement-biased 3.2i 24v V6, with punchy acceleration and excellent fuel economy. Featuring a water-cooled turbocharger plus special 32-bit engine management for enhanced performance and torque development - it produces an impressive 265Nm at 2500rpm. Twin contra-rotating balancer shafts and a dual mass flywheel ensure six-cylinder style levels of smoothness.

Choice of DTi diesels

The two DTi diesel engines (2.0 and 2.2 litre) are closely related, with common features including direct injection, charge air cooling and four-valve technology driven by a single overhead camshaft. The 2.2 litre unit can be specified in conjunction with the five-speed automatic transmission, the first time Vectra has been offered with a diesel auto option.

Choice of manual transmissions

Vectra is available with either a five-speed or an all-new six-speed manual transmission, the latter unit offered with the new 2.0i 16v Turbo engine. Combining light weight with a high torque capacity (up to 400Nm in all gears) the ratios of the unit have been carefully matched to the individual characteristics of the new engine. Like the five-speed, it features a lightweight cable shift system for reduced vibration and better fuel economy.

Powerfully sensitive

Five-speed automatic transmission

A five-speed automatic transmission is offered in combination with the 2.2i petrol, 2.2DTi diesel and range-topping 3.2i V6 engines. It offers outstanding performance, refinement and economy. The unit features adaptive shift patterns which can recognise a driver's style and adapt gear changes accordingly; it can also take account of ascents and descents and detect when a trailer or caravan is being towed. A winter setting allows the car to be driven away in fourth gear from standstill in slippery conditions, avoiding wheelspin. If the driver is in the mood for more sporty, manual shifts, sequential gear changes are also possible using the Active Select function.

Active Select

Active Select allows drivers to switch from automatic to manual sequential mode using a second transmission gate marked '+' and '-'. Within this gate, the driver can shift sequentially between the five gears, providing a greater level of involvement, manual gearbox-style.

Flexible service intervals

With Vectra, Vauxhall offers customers a flexible and cost-effective service interval plan designed to optimise the oil change and service requirements for each driver.

Known as ECOService-Flex, the new plan works via the engine management system and uses Oil Life Monitoring technology which measures distance travelled, engine speed, driving cycles, coolant and oil temperatures, and (for diesels) engine torque and fuel used. The system then calculates the optimum interval for the next service using an intelligent algorithm. Depending on how the car is driven, this interval can be anything up to 20,000 miles/two years for petrol engines and up to 30,000 miles/two years for diesel engines. A service interval monitor located on the instrument panel alerts the driver when the next service is required. For the ECOService-Flex system to function effectively, the vehicle must use only Vauxhall approved oils.

- 1 *Five-speed automatic transmission with Active Select.*
- 2 *Vectra features a range of petrol and diesel ECOTEC units.*

Vectra's advanced range of engines and transmissions offer the best possible combination of real-world performance, fuel efficiency and environmental control.

The latest unit to join the Vectra line-up is the new 2.0i 16v Turbo ECOTEC engine which – in combination with a sophisticated new six-speed manual transmission – provides strong acceleration allied to superlative economy and refinement.

Dynamically controlled

- 1 | *Emergency Brake Assist (EBA) enhances pedal feel and can reduce stopping distances.*
- 2 | *Vectra was subjected to a vigorous chassis testing programme.*

Front suspension

Vectra's front suspension uses a lightweight MacPherson strut arrangement, with aluminium hub carriers and control arms to reduce unsprung weight and provide greater control of wheel movement. The suspension is attached to a separate sub-frame which, in turn, is connected to the body via bushes which help isolate against road harshness and engine vibration. A high degree of lateral subframe stiffness helps maximise body control. Vectra also features Vauxhall's proven DSA (Dynamic SAFety) suspension technology which enhances stability when braking on surfaces with differing levels of grip by increasing toe-in at the wheel with the greater grip.

New multi-link rear suspension

The completely redesigned rear suspension uses a four-link independent set-up that provides superb refinement and control. Lightweight aluminium control arms and uprights reduce unsprung weight for enhanced ride and roadholding, while the suspension bushes are designed to combine smooth ride and low road noise with sharper handling.

ABS with Cornering Brake Control (CBC)

All Vectra models are equipped with this important safety feature. Anti-lock Braking System (ABS) have been shown to help reduce stopping distances, particularly on slippery road surfaces. By preventing the wheels from locking up, they also allow drivers to retain control of the steering and help prevent vehicle instability during emergency braking.

Cornering Brake Control also makes the car easier to control in emergency braking situations, particularly when braking sharply on a bend. It is especially beneficial when carrying out emergency avoidance procedures.

All-round disc brakes with Emergency Brake Assist (EBA)

As well as disc brakes all round (the front pair ventilated for enhanced performance), all models feature Emergency Brake Assist for improved stopping potential and greater pedal feel. This detects the urgency with which the brake pedal is pressed and rapidly increases the pressure to the maximum the system can provide, potentially shortening stopping distances (particularly in emergency situations).

In tests, the stopping distance from a speed of 62mph was reduced by almost a metre.

Electronic Stability Programme (ESP-plus) and Traction Control

Working in conjunction with the car's traction control system (TC-plus), ESP-plus helps maximise the driver's control of the vehicle during adverse or emergency driving situations. It's standard on GSi and 3.2i V6 24v Elite models and optional at extra cost on all other models except LS. Conventional ESP systems monitor the front and rear of the car, comparing their respective directions of travel with the driver's input through the steering wheel. If the vehicle begins to slide, they gently and imperceptibly apply corrective braking force to a given wheel, compensating for the slide. ESP-plus applies varying braking forces on up to three wheels at any one time, helping the driver regain control much more rapidly.

Vectra's brilliant Interactive Driving System (IDS) creates a new benchmark in ride, handling and active safety.

IDS works by connecting the control and safety functions of the individual chassis components – all of which have been optimised for the new model. The system combines lightweight MacPherson strut front suspension with all-new four-link independent rear suspension for outstanding ride, handling and roadholding. Electronic brakeforce distribution and cornering brake control promote enhanced control, particularly in extreme driving conditions, while map-controlled electro-hydraulic power-assisted steering (EHPS) provides optimum assistance at all speeds.

Electronic Brakeforce Distribution (EBD)

EBD works in conjunction with ABS to distribute the applied braking force between the wheels most able to use it. This allows Vectra to brake in a consistently stable, efficient and above all safe manner, even when heavily laden.

Electro-Hydraulic Power-Assisted Steering (EHPS)

A sophisticated new electronic map-controlled electro-hydraulic power-assisted steering system (EHPS) provides enhanced manoeuvrability and improved driver comfort while being more economical than conventional systems.

Active front seat head restraints

Vectra's active front seat head restraint system helps reduce whiplash injuries in the event of rear-end impacts. The system is integrated into both front seats and is activated mechanically by the action of the occupant's body being forced back into the seat. An advance on the previous system, the head restraint moves forwards as before, while the upper part of the backrest assumes a more upright position, further reducing the risk of injury.

ISOFIX child seat system

All Vectra models are fitted with ISOFIX child seat fittings on both outer rear seats. The system employs a rigid anchoring mechanism which secures the specially designed child safety seats to the vehicle itself. This virtually eliminates the dangers that can result from improper installation.

Automatic front seat occupancy detection

Elite models feature automatic front seat occupancy detection which senses when the front passenger seat is unoccupied and prevents the airbags on the passenger side from inflating. It can also communicate with the transponder-equipped Vauxhall accessory baby seat. If the baby seat is secured on the front passenger seat the front and side-impact airbags on that side are prevented from inflating. This system is also optional on all other Vectra models and comes complete with ISOFIX child seat fittings for the front passenger seat.

Insurance friendly

Insurance costs account for more than 20% of the cost of ownership of a car in this class, so it's good to know Vectra's repair-friendly design contributes to extremely competitive insurance groups across the range. The car performed particularly well in the 15km/h front and rear impact tests carried out by Thatcham (after which repair costs are assessed both in terms of time and materials).

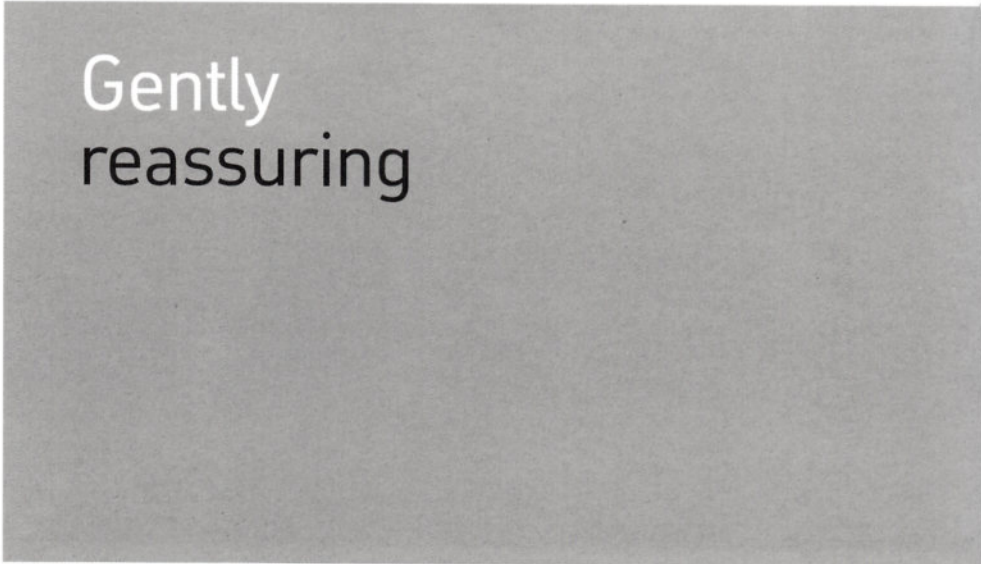

Remote central locking

Vectra's remote control central locking system works in two stages. The first stage unlocks the driver's door only; the second unlocks the other doors, bootlid/tailgate and fuel flap. When locking, the first stage locks the doors, bootlid/tailgate and fuel flap; the second stage activates the deadlocks and alarm system. The key fob can also be used to open or close the electrically operated windows and to close an electrically operated sunroof (where fitted) that has been left open. The bootlid/tailgate can also be unlocked using the key fob.

Engine deadlock immobiliser

The latest version of this system is resistant to 'code-grabbing' devices and employs a rolling security code which changes every time the system is used; there are billions of possible combinations. It's activated when the transponder-equipped key is removed from the ignition lock and deactivated when the key is reinserted. If the correct key and signal are not sensed the car cannot be started, even if it's already open. The system can be 'personalised' to accommodate up to five keys.

- 1 | Door-to-door illumination.
- 2 | Key unit operates remote control central locking and alarm system.
- 3 | Ultrasonic alarm system sensor.
- 4 | All Vectra models feature six airbags as standard.

Gently
reassuring

Remote control alarm system

All Vectra models feature an ultrasonic security alarm system with power siren, which senses interference with the doors, boot/tailgate, bonnet, ignition and audio, as well as detecting a window breaking or movement inside the car. The alarm is integrated with the central locking system and is armed/disarmed by locking/unlocking the vehicle: this can be done using the key or the remote facility. The ultrasonic movement sensor can be deactivated if required and the power siren has its own power supply for added security. The system also includes a tilt sensor. Hatchback models feature a rear glass breakage sensor using the heated rear window element.

Door-to-door illumination

Flick the main beam headlight stalk before leaving the vehicle and the dipped headlights and reversing lights will be activated and remain illuminated for 30 seconds. This allows sufficient time to make your way safely from the vehicle. The feature is of particular benefit when parking in unlit driveways, garages and car parks.

Other safety and security features include:

- Six airbags:
 - Driver's and front passenger's
 - Front seat side-impact
 - Full-size curtain airbags standard on all models
- Front and outer rear body-lock seatbelt pretensioners
- Front and outer rear seatbelt force limiters
- Height-adjustable front and outer rear seatbelts
- Lap and diagonal centre rear seatbelt
- Three adjustable rear seat head restraints
- Patented pedal release system
- Front, side and rear deformation zones
- Integrated steel side-impact protection beams
- High-strength B-pillar and roof crossmember
- Freewheeling lock cylinders

Vectra puts safety and security issues at the very top of its agenda.

With the latest passenger restraint features backed by advanced anti-theft measures and a body structure that gives outstanding protection in every kind of impact situation, Vectra takes good care of you, your passengers and their possessions.

Typically unique

With stylish hatchback and saloon bodystyles matched with four outstanding multi-valve petrol engines – and two efficient turbo diesels – Vectra offers a model to suit every kind of driver and, naturally, every budget.

The range begins in style with the remarkably well-equipped LS and Club – quite simply, our best ever 'entry' models. Two 'luxury' models, Elegance and Elite, focus on driver and passenger comfort, while for the sportier customer there are three choices – the SXi (the 'affordable performance model'), the comprehensively equipped SRi (with its lowered sports suspension), and the top 'sport' derivative, the GSi. Available only with Vauxhall's muscular 3.2i V6 24v quad-cam engine, it builds on the reputation enjoyed by previous generations of GSi models.

LS features include:

- Air-conditioning
- Driver's and front passenger's airbags
- Front seat side-impact airbags
- Full-size curtain airbags
- Anti-lock braking system
- Eight-way adjustable driver's seat
- Active front seat head restraints
- Front and outer rear seatbelt force limiters
- Electro-hydraulic power-assisted steering
- Steering column adjustable for reach and rake
- Cruise control
- Remote control central deadlocking
- Electronic engine deadlock immobiliser
- Service interval indicator
- CDR 2005 stereo radio/CD player
- Remote control security alarm
- Electrically operated front windows
- Electrically adjustable/heated door mirrors
- Rain-sensitive windscreen wipers
- Electro-chromatic anti-dazzle rear-view mirror
- Indirect night lighting

Vectra LS

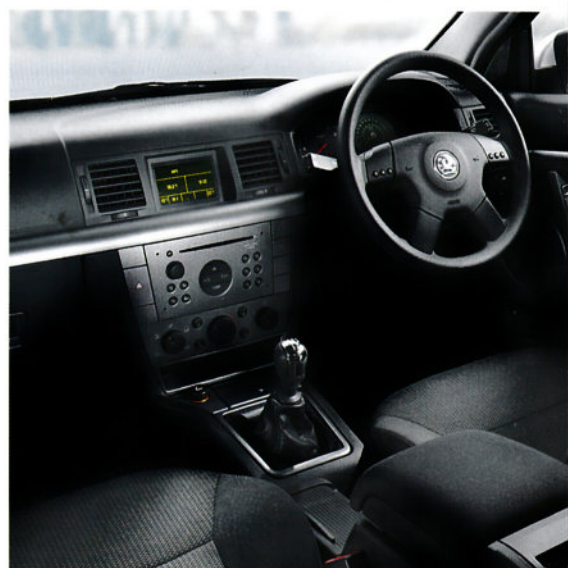

With a choice of hatchback and saloon body styles, four great engines and an equipment specification that wouldn't look out of place in a so-called 'premium segment' model, LS provides a superb introduction to the Vectra line-up.

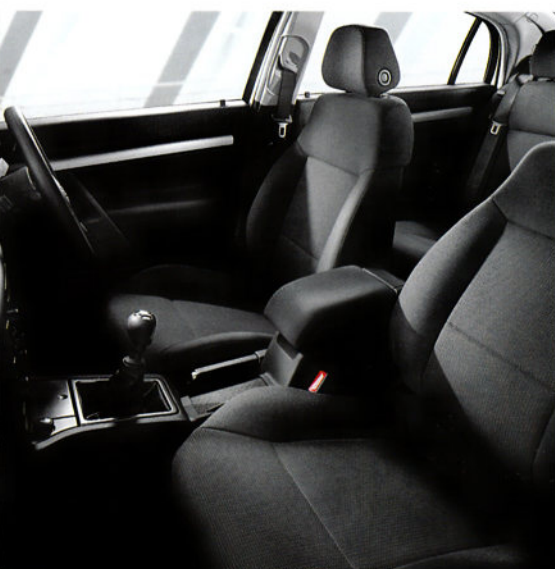

LS model line-up

5-door hatchback	1.8i 16v*	2.0DTi 16v	2.2DTi 16v	2.2i 16v
4-door saloon	1.8i 16v*	2.0DTi 16v	2.2DTi 16v	2.2i 16v
Insurance group (ABI)	7E	7E	8E	10E

*LPG/petrol Dualfuel version available

Model illustrated features driver information centre and two-coat metallic paint (optional at extra cost).

Vectra Club

With its stylish good looks set off by the added attraction of distinctive 16-inch, five-spoke alloy wheels, Club is a hugely appealing and undeniably value-conscious proposition. Choose from 1.8i 16v petrol and 2.0DTi 16v diesel models in a choice of hatchback and saloon body styles.

Vectra SXi

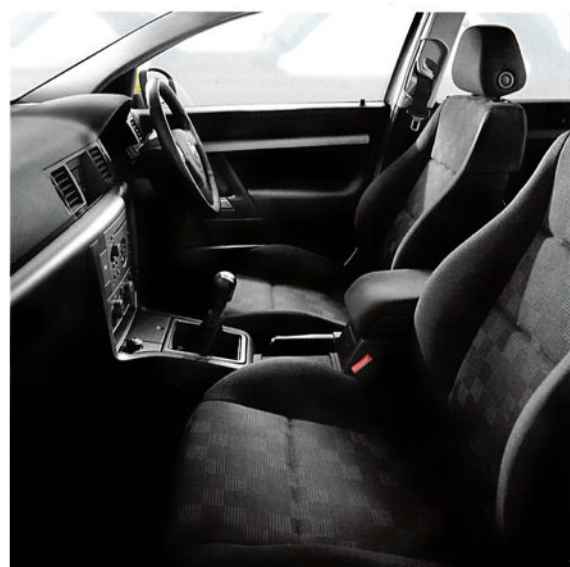

When affordable style and performance are the order of the day, look no further than Vectra SXi. The SXi range is particularly strong on choice, with hatchback or saloon body styles matched with a lively line-up of engines that includes the stunning new 175PS 2.0i 16v Turbo.

SXi model line-up

5-door hatchback	1.8i 16v*	2.0DTi 16v	2.2DTi 16v	2.2i 16v	2.0i 16v Turbo
4-door saloon	1.8i 16v*	2.0DTi 16v	2.2DTi 16v	2.2i 16v	2.0i 16v Turbo
Insurance group (ABI)	8E	7E	8E	10E	12E

*LPG/petrol Dualfuel version available

Model illustrated features electrically operated slide/tilt glass sunroof and two-coat pearlescent paint (optional at extra cost).

Vectra Elegance

With hatchback and saloon body styles and five engine choices, Elegance is the mid-range model with defiantly top-of-the-range aspirations. Chrome front door sill plates, 16-inch alloy wheels and wood-effect interior trim are just three of the features that bring added appeal to an already distinctive model.

Vauxhall accessories help make Vectra an even more attractive proposition for everyday life. And with Vauxhall, it's easy to select the items you require at the same time you order and finance your car, spreading the payments over time to suit your own particular budget. This section illustrates many of the products that are available, with highlights including a handy cool bag (which plugs into the car's cigar lighter) and a child seat with transponder, suitable for all models equipped with automatic seat occupancy detection for the front passenger's airbags. All products are tested to the same standards as the car itself and all come backed by a full 12-month warranty. For further details ask your Vauxhall dealer for a copy of the Vauxhall Car Accessories brochure and Car and Accessory Price Guide. Alternatively, you can find all the details on our website at www.vauxhall.co.uk/accessories

Equipment

Active front seat head restraints.

Front and rear parking distance sensors.

Vauxhall Assistance and warranties*

Standard features • A one-year unlimited mileage manufacturer's warranty • Second and third year no-fee customer option warranty up to 60,000 miles (from first registration) • Vauxhall Assistance for 12 months from first registration • Roadside breakdown cover in years two and three (subject to vehicle being serviced at a Vauxhall dealer) • Six years' body panel anti-perforation warranty

Safety

Standard features • Driver's airbag • Front passenger's airbag • Front seat side-impact airbags • Full-size curtain airbags • Anti-lock Braking System (ABS) • Electronic Brakeforce Distribution (EBD) • Cornering Brake Control (CBC) • Emergency Brake Assist (EBA) • Active front seat head restraints • Three height-adjustable rear seat head restraints • Pyrotechnic front and outer rear body-lock seatbelt pretensioner system • Front and outer rear seatbelt force limiters • Five lap and diagonal inertia-reel seatbelts (height-adjustable front and outer rear) • ISOFIX child seat system for outer rear seats (does not include child seat) • Anti-submarining ramps in all seats • Energy-absorbing steering column • Pedal release system • Front brake pad wear warning • Laminated windscreen • Side-impact protection beams • Integral protective side door padding • Reinforced passenger safety cell • Deformation zones front and rear • Burst-proof door locks and anti-jam door design • Child-proof locks on rear doors

Additional features	LS	Club	SXi	Elegance	Elite	SRi	GSi

Electrics

Alternator:

1.8i 16v/2.0i 16v Turbo/2.2i 16v – 100A.
3.2i V6 24v/2.0DTi 16v/2.2DTi 16v – 140A.

Maintenance-free battery:

1.8i 16v – 55Ah.
2.2i 16v/2.0i 16v Turbo/3.2i V6 24v – 66Ah.
2.0DTi 16v/2.2DTi 16v – 70Ah.

Transmissions

- Front-wheel drive
- Hydraulically actuated, asbestos-free single-plate clutch

Five-speed manual gearbox: standard on all models [exc. 2.0i 16v Turbo]. Close-ratio on 1.8i 16v SX/SRi.

Six-speed manual gearbox: standard on 2.0i 16v Turbo models.

Five-speed automatic transmission with

Active Select function: available at extra cost on 2.2i 16v/3.2i V6 24v/2.2DTi 16v models. Electronically controlled with adaptive driving function and winter mode. Fluid drive with torque converter, lock-up clutch, neutral control fuel-saving feature and Active Select.

The fuel consumption figures shown comply with EC directive 1999/100 to provide a realistic indication of fuel consumption by taking into account everyday driving conditions, such as cold starts, acceleration and braking. These figures take account of the vehicle's kerbweight, ascertained in accordance with the above regulation. **Important:** the results given relate to the particular car tested. Variations in trim level and equipment may result in slightly higher fuel consumption and CO₂ emission levels than those quoted. Driving style, road and traffic conditions, vehicle mileage and standard of maintenance may also affect fuel consumption; therefore the results do not express or imply any guarantee of fuel consumption attainable.

Brakes

Front ventilated disc brakes:

All models [exc. 2.0i 16v Turbo/3.2i V6 24v] – 285mm diameter.

2.0i 16v Turbo/3.2i V6 24v – 302mm diameter.

Rear disc brakes:

All models [exc. 2.0i 16v Turbo/3.2i V6 24v] – 278mm diameter.

2.0i 16v Turbo/3.2i V6 24v – 292mm diameter.

- Anti-lock Braking System (ABS)
- Cornering Brake Control (CBC)
- Electronic Brakeforce Distribution (EBD)
- Emergency Brake Assist (EBA)
- Front brake pad wear warning

Suspension

Front: Independent. Lightweight MacPherson struts with gas-pressure dampers and coil springs. Anti-roll bar. Lightweight aluminium uprights and control arms.

- SRi/GSi – uprated springs and dampers with lower ride height

Rear: Lightweight multi-link with rising-rate steel double cone mini-block coil springs and gas-pressure dampers. Aluminium lower control arm/upright reduces unsprung weight for enhanced ride/roadholding. Compact packaging ensures minimal intrusion into luggage area. Mounting bushes feature high lateral and low longitudinal stiffness for optimum roadholding and comfort.

- SRi/GSi – uprated springs and dampers with lower ride height
- LS/Club/SXi/Elegance/Elite – automatic self-levelling rear suspension option

Steering

- Electro-hydraulic power-assisted steering
- Turning circle (kerb-to-kerb):
LS/Club/SXi/Elegance/Elite – 10.96m [36.0ft.]
SRi/GSi – 11.01m [36.1ft.]

2.2DTi 16v SRi automatic	1523 (2040)	–	1500 (750)

[†] = Elegance/Elite only. tba = to be advised.

Gross vehicle weight is the total permissible weight of the vehicle including passengers and their luggage. To determine total carrying capacity, deduct kerbweight from gross vehicle weight. Note that the figure obtained will include the weight of the driver, passengers and any optional equipment or accessories. The **maximum roof rack loading** should not exceed 100kg. The **maximum towing weights** are based on the ability of the car, with two occupants of 70kg each, to restart on a 12% gradient, which is approximately 1 in 8.3, at sea level. At altitudes above 1500 metres, the engine output may drop with a corresponding reduction in towing capability. Any extra weight, such as luggage or additional passengers, should be deducted from the maximum towing weight. With a trailer fully loaded, **maximum noseweight** should not exceed 78kg. Always fit Vauxhall towing attachments and accessories available from your Vauxhall dealer. They are designed specifically for Vauxhall models and carry a 12-month guarantee.

Vectra Dualfuel LPG Data

As the first UK manufacturer to introduce a range of factory-prepared and fully warranted LPG (liquefied petroleum gas)/petrol models, Vauxhall is committed to developing its Dualfuel range. Vectra Dualfuel models are based on the Euro 4 compliant 1.8i 16v engine, fitted with gas sequential injection. Thanks to the substantially lower retail price of LPG relative to petrol or diesel, it's possible to travel 50% further for the same fuel cost when running a Vectra Dualfuel model on LPG. With over 1100 LPG outlets across Britain at the time of publication, you're never far away from a refuelling site.

LPG operation

Typical range in gas mode: Around 260 miles. The actual range will depend upon the model, vehicle load and type of driving.

Service intervals: In line with Vectra's standard service intervals, Dualfuel models require both visual checks and a system

pressure check, while a tank inspection, magnet cleaning and the renewal of the filter are required every six years.

Performance

Compared to a standard petrol vehicle, a marginal (3%) deterioration in acceleration is to be expected owing to the nominal decrease in power, combined with the increase in kerbweight.

LPG tank and refuelling

Tank location: Spare wheel well. The filler is located on the rear offside of the vehicle next to the regular fuel filler flap.

Tank capacity: 45 litres (9.9 gallons).

Refuelling time: Generally the same as petrol, depending on type of pump available.

Luggage compartment: The luggage capacity will be slightly reduced due to the relocation of the space-saver spare wheel to a position within the luggage compartment.

Conversion weights

Kerbweight is increased by around 79kg over standard vehicles, with a corresponding reduction in total carrying capacity.

LPG system safety features

- Installation meets international standard ECE 67/01
- Automatic gas supply shut-off in a major accident
- Unique format gas filler port allows connection to authorised LPG refuelling points
- Gas filler pipe is encased within an outer hose which vents to atmosphere
- Excess flow valve on LPG tank automatically shuts off gas supply in the event of a hose or pipework being severed or disconnected
- System automatically switches over to petrol should gas run out
- Controlled cylinder venting in the event of a vehicle fire

Power, fuel economy (mpg (litres/100km)) and emissions in LPG mode

	Maximum Power	Maximum Torque	Urban driving	Extra-urban driving	Combined figure	CO ₂ emissions (g/km)
1.8i 16v exc. SXi/SRi	118PS [87kW]	164Nm [121 lb.ft.]	20.9 [13.5]	37.7 [7.5]	29.1 [9.7]	157
1.8i 16v SXi/SRi	118PS [87kW]	164Nm [121 lb.ft.]	20.6 [13.7]	36.7 [7.7]	28.5 [9.9]	160

Audio and communications

Vectra features the very best in audio and communications. Highlights include the latest double DIN-sized audio units (fitted as standard right across the range) and the NCDC 2013/NCDC 2015 advanced navigation system employing sophisticated satellite-aided technology.

Audio features

General (all models) • Remote display • Steering wheel mounted audio controls • Programmable, speed dependent volume control • Separate bass and treble controls • Balance control • Dimmable illumination • Fault diagnosis facility • Four-figure security code burnt into memory chip • Engraved identification number with passport

Tuner (all models) • FM and MW reception • Microprocessor-controlled quartz tuning • Full RDS EON with Traffic Programme • Volume adjustment for Traffic Programme and telephone • Up and down manual tuning function • Automatic search tuning • Autostore function

Cassette player (CCR 2006/CCRT 2008) • Fast forward and rewind facility • Autoreverse function • Cassette Programme Search (CPS)

• Radio reception during fast forward and rewind • Cassette standby facility • Automatic chrome/metal mode selection • Dolby B noise reduction

CD player (all models) • Track up/down facility • Random play facility • Continuous play facility

Additional features	CDR 2005	CCR 2006	CCRT 2008	NCDC 2013	NCDC 2015
Maximum output (watts per channel)	20	20	7	20	20
Number of speakers	7	9	9	9	9
Number of station preset buttons	6	6	10	10	10
Single-disc CD player	•				
Four-disc CD autochanger		•	•	•	•
Direct disc selection		•	•	•	•

Security

Vectra audio systems are among the best protected in any car. As well as the four-figure security code burnt-in to the memory chip at the factory, all units have a remote display plus the unique, tapered 'double DIN' facias, making all units virtually useless to any thief since they cannot be used in any other application.

Full RDS EON with Traffic Programme offers two-fold advantages. Automatic tuning allows an RDS station to be 'locked-on' so that should the car travel in and out of various transmitter ranges, the set will automatically re-tune to the strongest signal for that station to maintain optimum reception. When locked on to an RDS station, the station name will be displayed on the multi-function display,

rather than the frequency. Secondly the Traffic Programme can automatically broadcast travel flashes from the nearest BBC transmitter. Travel flashes will interrupt whatever audio programme is currently being played – even cassette or CD playback – at a pre-determined volume level.

Navigation

The new NCDC 2013 and NCDC 2015 audio units use the latest Siemens CD-ROM-driven satellite-aided navigation system. It directs the driver to a chosen destination using clearly spoken voice instructions, backed by directional pictograms displayed on the car's multi-function display.

Coverage

Navigation CD-ROM coverage already includes most countries in Europe. While the Vauxhall-supplied CD-ROM covers mainland Britain in detail, those for other European countries also show the whole European trunk road network. All discs are updated twice a year, available at extra cost by subscription.

Colour monitor

Optional at extra cost, a five-inch colour monitor is available separately for use with the NCDC 2013 and 2015 system. Taking the concept one stage further, it displays the proposed route in map outline. The colour unit also makes the whole screen available for display, rather than having 'reserved' areas for set functions as on traditional multi-function displays.

Models fitted with the optional colour monitor benefit from further enhancements. The 'intersection zoom' function allows you to view a graphical representation of complex road layouts (e.g. a staggered junction or a roundabout with more than four exits), providing a clearer illustration of the route to follow than would otherwise be possible. The 'enhanced corridor' function lets you view a map of the area up to three miles either side of the route you are travelling, providing a clearer indication of your position relative to the rest of the road network.

The new set-up also allows you to remove the navigation CD-ROM and listen to an audio CD while the system is still running.

Directional pictograms give simple route and distance information.

Further features include:

- Automatic re-routing on request
- Display of estimated remaining time and distance to destination
- Exact actual location of vehicle using the GPS (Global Positioning System) and speed sensor
- Four different route types:
 - Using motorways where possible
 - Avoiding motorways
 - Shortest distance
 - Shortest journey time
- Last 10 destinations stored automatically
- Up to 100 destinations can be stored

Optional colour monitor in 'map view' provides a clear view of roads and towns.

The Vauxhall carphone

Available on all Vectra models, the Vauxhall carphone [CCRT 2008] is a dual-band GSM mobile phone and a stereo radio/cassette/CD player all fully integrated into one unit. Alternatively, drivers can opt for the more sophisticated NCDC 2015, which offers all of the features of the CCRT 2008 (except for the cassette player) plus the added benefits of satellite navigation.

Removable SIM card (please note: an adaptor may be required).

The radio, cassette, CD and phone all share the same facia control panel, remote display and steering wheel audio controls. The Vauxhall carphone offers state-of-the-art GSM mobile phone functions: you simply insert your existing mobile phone SIM card (an adaptor may be required), then make and receive calls through the remote microphone and car audio speakers. The carphone's 'hands-free' operation allows the driver to not only conduct a telephone conversation, but

make, receive and end calls with both hands safely on the steering wheel. From a quality perspective, the factory-fit installation means that the whole system is of original equipment quality and comes with a full Vauxhall warranty.

Integrated carphone features:

- GSM Phase 2 standard
- Hands-free operation
- Interface for external handset
- Emergency call facility without SIM card
- Menu for phone-specific settings
- Voice transmission
- SMS messaging service
- Microphone mute function
- Choice of 12 different display languages
- Call reminder for last 10 incoming calls
- Redial of last 10 numbers
- Multiple calls and conference calls
- Phonebook for SIM card
- Recall of stored names
- Full editing of stored names or messages
- Phone-specific options menu, including call-barring

Please note: The CCRT 2008 carphone is compatible with both the GSM 900 and 1800 frequencies. At present the NCDC 2015 carphone is only compatible with the GSM 900 frequency (i.e. Vodafone and O2 – though not with the pre-paid O2 SIM card). It is not compatible with the GSM 1800 frequency (i.e. Orange and T-Mobile).

Telephone pre-wiring

Helping to keep Vectra drivers in touch at all times, telephone pre-wiring is available at extra cost on models that do not have the CCRT 2008 and NCDC 2015 carphone installed. The system allows drivers to listen to incoming calls via the car's audio speakers and can even provide an incoming call message via Vectra's built-in multi-function display panel.

Telephone pre-wiring is fitted in the factory to ensure full compatibility with the original wiring, eliminating the problems often associated with aftermarket systems. It comprises an integrated harness for a mobile phone complete with power and aerial connections. The pre-wiring is compatible with both the GSM 900 and 1800 frequencies.

Colour and trim availability

Vectra's interior colour and trim combinations, available in cloth, velour and leather, have been carefully selected to complement the exterior paintwork while reflecting the individual status of each model in the range. All Vauxhall dealers have a comprehensive showroom colour and trim display, with actual exterior paint and interior trim samples, available for inspection.

Trust Vauxhall

There are more important things to life than worrying about how to finance and service your car, where to go in the event of an accident and how we go about meeting the transport challenges of the future. So when you choose Vauxhall, you can rely on us to safeguard both you and the environment around you, leaving you free to concentrate on the more important business of enjoying your car!

Protecting the environment

Our products are increasingly winning environmental awards, both through the use of more recycled materials and by becoming cleaner and more efficient (see www.vauxhall.co.uk/recycling for details). We're already working to reduce the carbon dioxide emissions from our new cars by 25% by 2008.

Vauxhall was also the first manufacturer to offer a range of Dualfuel LPG/petrol vehicles, supported by a full warranty.

Looking to the future, we are also investing heavily in the biggest potential breakthrough of the next decade – the hydrogen fuel cell car.

Buying your car

Vauxhall Finance is the affordable way to finance your new car. There are packages to suit every budget and the whole process is convenient to arrange at your Vauxhall dealership.

Customer Care Commitment

Providing drivers with the highest standards of aftersales support, Vauxhall offer a three-year Customer Care Commitment* package. Highlights include:

- A one-year unlimited mileage manufacturer's warranty
- A second and third year no-fee customer option warranty to 60,000 miles from first registration
- Vauxhall Assistance for 12 months from first registration
- Roadside breakdown cover
- Free loan car

* Warranty is only available on vehicles sourced from Vauxhall Motors Ltd. Terms and conditions apply – please see your Vauxhall dealer for details.

Sureguard protection

Should you wish to enjoy the range of benefits provided by Vauxhall Assistance for a full three years from first registration, then new Sureguard Assistance is for you. If you are a higher

mileage driver or plan to keep your vehicle for longer than the standard warranty period, you need the protection of Sureguard Warranty. This provides all the peace of mind of a parts and labour warranty – including Assistance – for the duration of your cover. Sureguard Warranty and Sureguard Assistance now come with the added peace of mind of Sureguard MOT Warranty. For details contact your local Vauxhall dealer or call 0870 752 7020.

Vauxhall Assistance

Vauxhall Assistance is operated by the AA and is provided for 12 months from date of first registration and covers everything from accidents, mechanical breakdown and flat tyres to illness while driving – even lost keys. With Vauxhall Assistance, help is literally just a free** phone call away, 24 hours a day, 365 days a year!

** Mobile phone users will be charged at their standard tariff.

In the event of an accident...

Vauxhall Accident Support is designed to help keep you mobile following an accident, providing prompt recovery to a Vauxhall Approved Accident Repair Centre where your vehicle can be repaired to a high standard. The service is free to all Vauxhall drivers. For further information Freefone 0800 010 304.

Specialist Mobility advice

Motability accredited Vauxhall dealers can provide special mobility help and advice. Blue badge holders are entitled to very favourable discounts when purchasing new vehicles. For full details contact your local Motability accredited Vauxhall dealer or Freefone 0800 731 5267.

For more information...

For a brochure on any Vauxhall model (up to a maximum of three per caller) or location of your nearest Vauxhall dealer please Lo-call 0845 600 1500.

Vauxhall Leasing

As Vauxhall's own contract hire and fleet management operation, Vauxhall Leasing provides a one-stop-shop for competitive car and van leasing solutions – for business users and private individuals. Working with the Vauxhall dealer network, we combine the support of a national contract with the convenience of a local contact. For further information, please see your local Vauxhall dealer or call us on 01926 452 557. Alternatively, visit our website at www.vauxhall-leasing.co.uk

Servicing and maintenance

The best way to maximise the performance and reliability of your Vauxhall is to have all routine servicing and maintenance carried out at a Vauxhall dealer. There are over 470 dealers nationwide.

Alternatively, details can be found on our website at www.vauxhall.co.uk

A NEW VAUXHALL Have fun getting there

The GM Platinum Card is issued by HFC Bank plc and is available to persons aged 18 years or over and resident in the UK (or 21 and over in the Channel Islands) and is subject to status and conditions. Written quotations available upon request from The GM Platinum Card, PO Box 3615, Birmingham B1 2XU. For Balance Transfers and Purchases the rate is 0% per annum fixed for five months from account opening. **(14.9% APR)**. For Balance Transfers and Purchases made after introductory period, the **APR is 14.9%**. A handling fee of 1.75% (or minimum £2.50) will be made on all Cash Advances other than Balance Transfers. **18.9% APR**. No interest on Transactions if the balance is paid in full by the due date, otherwise interest payable from the date of Transaction. Interest payable on Cash Advances and Balance Transfers from date of advance. Monthly minimum payment required is 2% of the outstanding balance, with a minimum of £5 or the balance if less. Other than the fixed rate for the introductory period as mentioned, all credit charges and APRs are variable. The APRs quoted are the rates for new customers. For APR and current charges please refer to your Terms and Conditions. Payments will be applied first to the repayment of any introductory or promotional rate Balance Transfers. *Rebate Points are earned on purchases using The GM Platinum Card. Rebate Points are not earned on Balance Transfers or Cash Advances. You earn money off a new Vauxhall by accumulating Rebate Points under the Rebate Points Programme. Vauxhall Motors Ltd is solely responsible for the operation of the Rebate Points Programme, which is subject to the Rebate Points Programme Rules. You can redeem up to 2500 Rebate Points and unlimited Partner Points subject to the Model Line Maximum which will vary in amount in relation to different Vauxhall vehicle model lines. Rebate Points and unlimited Partner Points are redeemable as discounts on a new Vauxhall vehicle and must be redeemed within four years of your account opening. Rebate Points may not be redeemed by Motability Contract Hire customers. 'The GM Card' is a trading name and style of both HFC Bank plc and Vauxhall Motors Ltd. HFC Bank plc is a member of the Household International Group of Companies and is authorised and regulated by the Financial Services Authority. Registered Office: North Street, Winkfield, Windsor, Berkshire SL4 4TD. Registered in England number 1117305. Vauxhall Motors Ltd, Registered Office: Griffin House, Osborne Road, Luton, Bedfordshire LU1 3YT. Registered in England number 135767.

Every effort has been made to ensure that the contents of this publication were accurate and up-to-date at the time of going to press (April 2003).

Vauxhall vehicles are equipped with components manufactured by various General Motors operating units and outside suppliers. In line with Vauxhall's policy of continuous product improvement, the Company reserves the right to change specifications and make modifications to the vehicles described and illustrated at any time.

Any such modifications will be notified to Vauxhall dealers at the earliest opportunity; please consult your local dealer for the latest information.

The specifications detailed within this brochure are not necessarily applicable to alternative models such as Special Editions. Details of any such models will be contained in specific literature or found on the Vauxhall website.

The colours reproduced in this brochure may vary slightly from the actual paint colour or trim material due to the limitations of the printing process.

Please note that Vauxhall dealers are not the agents of Vauxhall Motors Limited and are not authorised to bind the Company by any specific or implied undertaking or representation.

It is advisable to ensure that your motor insurance policy provides adequate cover for additional fitted accessories.

As part of Vauxhall's policy of environmental care, this brochure is printed on paper manufactured using Elemental Chlorine Free pulps from specially farmed, sustainable timber resources.

All rights reserved. No part of this publication may be reproduced in any form or by any means, without the prior written permission of Vauxhall Motors Limited.
